UnaliWear™

Extending independence with dignity

"The Kanega Watch is my 'go-with-me', ever present companion. I really didn't want to wear a pendant, so this is the perfect option"

Paul M.
(Better Business Bureau Independent 5-Star Review)

Meet The Kanega Watch

Traditional medical alert devices are worn grudgingly, if at all. People want to feel protected, particularly from unexpected falls, but clunky and stigmatizing pendants are a huge turn off.

Modern and Smart-Looking - Offering Discreet Protection

- The only 24/7 medical alert smartwatch with fall detection.
- No pendant (or cellphone or base station) required. The watch is your entire medical alert system.
- Press crown button or simply ask for help to reach US-based emergency response operators 24/7/365 (fall detection activation will automatically connect).
- Real round-the clock protection, from bed to shower to out shopping. Never needs to be taken off to charge.

Did You Know?

Traditional medical alert devices are worn, on average, less than 40% of the time vs. close to 90% for the Kanega Watch.

"I think it is great to wear all the time and gives me security day and night."

The Kanega Watch: A Watch Like No Other

	Kanega Watch	Other Medical Alert Watches	Apple Watch
Can be worn 24/7—from bed to shower to shopping—no need to remove to charge	✓	✗	✗
Fall detection built into watch	✓	Rarely	✓
Features RealFall™ technology	✓	✗	✗
WiFi AND cellular connectivity - for best call coverage/GPS	✓	✗	✓
3 ways to get help; button, voice OR fall detection	✓	✗	✗
Connects to US-based monitoring center with all wearer's info	✓	✓	✗
Medication reminders	✓	Rarely	✓
Works out of the box - no set up required	✓	Not Always	✗
Price lock guarantee - no increase ever	✓	✗	✗

Did You Know?

Other mobile medical alert devices use only a cellular connection for emergency response. The Kanega Watch uses both WiFi (in the home) and Verizon Cellular (outside the home). If you have limited or spotty cell service in your home, a clear WiFi connection can be critical.

"Kanega uses both wifi and cell, so I have dependable coverage nearly anywhere."

The Kanega Watch in an Emergency

Press or Speak

Immediately connects to a US-based response operator 24/7/365 who knows your name, address, location, emergency contacts and other key info you have provided to UnaliWear.

Auto Fall Detection

Alerts the operator (even if you can't press or speak) who will promptly reach out to your emergency contacts and can dispatch emergency services to your GPS location.

The Help You Need

Your response operator is trained to quickly determine and engage the appropriate support needed – ambulance, fire, police or simply contacting a family member or neighbor. Your stand-by assistance is **always there.**

UnaliWear's RealFall™ Fall Detection

- Comes standard in every watch at no additional cost/fee
- Developed based on actual fall data by Kanega Watch wearers and gets increasingly smarter, continuously improving fall detection accuracy.
- Learns each wearer's natural movements over time, further reducing/eliminating false fall alerts.

"My father wandered into the garage at 2:30 am. one night. The lights went out and he fell. Thank goodness he was wearing his Kanega Watch. We immediately received a call that he had fallen".
