

UnaliWear™

Extending independence with dignity

“The Kanega Watch is my 'go-with-me', ever present companion. I really didn't want to wear a pendant, so this is the perfect option”

Paul M.

(Better Business Bureau Independent 5-Star Review)

Meet The Kanega Watch

Traditional medical alert devices are worn grudgingly, if at all. People want to feel protected, particularly from unexpected falls, but clunky and stigmatizing pendants are a huge turn off.

Modern and Smart-Looking - Offering Discreet Protection

- The first all-in-one medical alert smart watch with built-in fall detection.
- No pendant (or cellphone or base station) required. The watch is your entire medical alert system.
- Press or Speak to reach US-based emergency response operators 24/7/365.
- Round-The-Clock Protection, even at night and in the shower; never needs to be taken off to charge and fully waterproof.

Did You Know?

Traditional medical alert devices are worn, on average, less than 40% of the time vs. close to 90% for the Kanega Watch.

"I think it is great to wear all the time and gives me security day and night."

Nancy P.

(Better Business Bureau Independent 5-Star Review)

The Kanega Watch vs. other mobile medical alert alternatives:

	Kanega Watch	Other Medical Alert Watches	Apple Watch
Can be worn 24/7; no need to ever remove to charge	✓	✗	✗
Fall detection built into watch	✓	✗	✓
Watch learns wearer's movements - minimizing false alerts	✓	✗	✗
WiFi AND cellular connectivity - for best call coverage/GPS	✓	✗	✓
3 ways to get help; button, voice OR fall detection	✓	✗	✗
Connects to US-based monitoring center with all wearer's info	✓	✓	✗
Can wear in shower, doing dishes, etc.	✓	Not Always	✓
Medication reminders	✓	Rarely	✓
Works out of the box - no set up required	✓	Not Always	✗
Price lock guarantee - no increase ever	✓	✗	✗

Did You Know?

Other mobile medical alert devices use only a cellular connection for emergency response. The Kanega Watch uses both WiFi and Cellular. If you have limited or spotty cell service in your home, a clear WiFi connection can be critical.

"Kanega uses both wifi and cell, so I have dependable coverage nearly anywhere."

Garnet P.

(Better Business Bureau Independent 5-Star Review)

The Kanega Watch in an Emergency

Press the Crown Button or Speak

Immediately connects to a US-based response operator 24/7/365 who knows your name, address, location, emergency contacts and other key info you have provided to UnaliWear.

Auto Fall Detection

Alerts the operator even when you can't press or speak, sending immediate emergency services.

Emergency Response

Your response operator is trained to quickly determine and engage the appropriate support needed - ambulance, fire, police or simply contacting a family member or neighbor. Your stand-by assistance is always there.

UnaliWear's Fall Detection

- Comes standard in every watch at no additional cost/fee
- No neck pendant required
- Fall detection sensitivity level can be customized to best match wearer's lifestyle.
- Uniquely learns each wearer's natural movements, reducing false fall alerts.

"My father wandered into the garage at 2:30 am. one night. The lights went out and he fell. Thank goodness he was wearing his Kanega Watch. We immediately received a call that he had fallen".

Linda J.

(Better Business Bureau Independent 5-Star Review)

"If fall detection is your number-one priority, the Kanega Watch's round-the-clock monitoring and battery system make it our preferred choice."

30-day risk FREE trial

Plus special discounts for 2-watch households, AARP members and military families (active duty and veterans)
